

The Terna 02 Prize

International Competition

contemporary arts

Posted by Monica Guala - 07.08.2009

The Terna 02 Prize is an awards competition (the "Terna 02 Prize") aimed at promoting contemporary artists and art in Italy and at enhancing the relationship between art and the business world.

The subject of the Terna 02 Prize on which the artists are required to express their creativity is "Energy:Mankind = Future:Environment. The proportion for new aesthetics", concepts that guide Terna in defining its development strategy for infrastructures supporting eco-sustainability. The Prize is divided into 3 categories for the national section (MEGAWATT, GIGAWATT AND TERAWATT) in which Italian and foreign artists can participate who work steadily in Italy and into a category for the international section (CONNECTIVITY NEW YORK), in which Italian and foreign artists can participate who work steadily in New York City (districts of Manhattan, Bronx, Brooklyn, Queens and Staten Island). The winning Artworks of the Terna 02 Prize will be awarded during a ceremony (the "Prize Ceremony") and will be displayed at an exhibit (the "Exhibit") that will take place both within the month of December 2009 at a museum or other venue in the city of Rome or Milan; this information will be published in the website www.premioterna.com.

The Terna 02 Prize will begin on May 26, 2009 ("Beginning Date") and the artists can participate by submitting their Artworks within 6:00 p.m. of October 10, 2009 ("Last Registration Date"). Prizes must be collected no later than January 31, 2010.
